SKILLS

Frontend: JavaScript, React.js, Vue.js, jQuery, HTML, CSS, SASS / SCSS, Bootstrap

Backend: Node.js, Express, PHP, SQL (PostgreSQL, MySQL)

Other: Git, Docker, REST APIs, Photoshop, WordPress

EXPERIENCE

Bergen Blended Academy

Web Developer and Teaching Instructor

December 2017 – May 2023

Hasbrouck Heights, NJ

- Designed, developed and maintained a private database system built using .NET and PostgreSQL to manage thousands of student records
- Built a WordPress website to establish the school's online presence, and subsequently maintained it according to the director's requirements
- Successfully designed and taught technical courses on web development (focusing on HTML, CSS, and JS) for job-seeking, adult students
- Regularly assisted the director in various essential technical projects necessary for the seamless continuation of school operations

Snow Joe

Frontend Web Developer

April 2019 – August 2019

Carlstadt, NJ

- Successfully built components, updated pages, and fixed bugs on the Shopify frontend of Snow Joe's official website, ensuring a pleasant user experience (UX) for thousands of eCommerce customers
- Accurately followed specifications in developing Vue.js apps for an internal portal used by the company's "Data Team" to track and manage customer orders, shipping, and other records
- Frequently collaborated with various team members, and actively communicated with the lead developer to ensure the success of each task

Custom Boat Repairs

Freelance Web Developer

April 2018 – July 2018

Remote

- Rebuilt an outdated Flash site from scratch in plain HTML, CSS, and JS on a lightweight PHP backend, providing the business owner with a modern, faster, and mobile-friendly web presence

BJ Floors and Kitchens

Web Developer and Administrator

December 2014 – September 2015

Passaic, NJ

- Built and administrated an official website in WordPress to replace an outdated, mobile-unfriendly WIX site, providing the business with an enhanced online presence
- Maintained a large inventory of products on the company's second eCommerce website according to a frequently-changing catalog

Jossbox

Freelance Web Developer

September 2014 – January 2015

Remote

- Collaborated with in-house designers to translate PSD mockups into HTML, CSS, and JS code to be used on the fashion magazine's website
- Successfully updated critical parts of the site's frontend code, integrating a mobile menu, responsive layout, and enhancing the overall UX
- Configured the site's Magento backend, mainly through file-bundling and image-optimization, thereby greatly improving page load times

EDUCATION

Rutgers University

Completed three years of coursework towards a Computer Science major

2015 – 2018

Newark, NJ

PROJECTS

Trade Journal

github.com/metaaxiom/trade-journal

October 2022

React.js app that utilizes the TD Ameritrade API to tabulate the user's stock market transactions, and allows the trader to group selected transactions into descriptive journal entries.

US County Choropleth

github.com/metaaxiom/population-choropleth

May 2022

Vue.js app featuring an interactive, D3.js map of US counties, which can be assigned into color-coded groups listing population data.
